

NEW GENERATION OF AIR COMPRESSORS FOR THE VOLVO GROUP

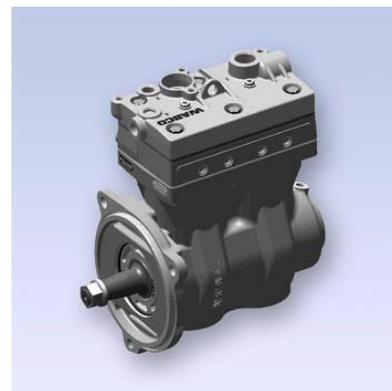

As global leader in compressed air braking systems, WABCO offers a comprehensive range of air compressors.

WABCO initiated a compressor improvement project for all Volvo Group applications as part of the ongoing optimization process.

IMPROVEMENTS

Compressor lifetime will be increased thanks to the:

- Reduction of carbon-build-up (CBU) behavior of the compressor by Introduction of CBU-reduction holes for improved cooling performance of cylinder head
- Implementation of optimized power reduction system (OPR)

COMPRESSORS FOR VOLVO GROUP

As part of this improvement project WABCO will switch over several compressors for Volvo Group applications to a new generation.

The new generation of air compressor is available for purchase as from today.

The table below lists the product numbers of the compressors for Volvo Group applications that will be switched to the new generation:

OLD Product Number	New Product Number	Compressor Type	Vehicle Application
912 512 008 0	912 512 029 0	636 cc	VOLVO
912 214 004 0	912 514 009 0	636 cc	Renault
912 542 002 0	912 542 007 0	636 cc	Mack
912 551 002 0	912 551 006 0	636 cc	UD
912 512 028 0	912 514 030 0	636 cc, clutch	VOLVO
912 514 008 0	912 514 010 0	636 cc, clutch	Renault
412 704 018 0	412 704 027 0	704 cc	VOLVO

Information on WABCO products can be found on our product catalogue website, (inform.wabco-auto.com) by entering the product number in the "Product Number" search field.
