

## WABCO AUSTRALIA POWER BOX

WABCO Australia are locally producing a power box that can be used when carrying out diagnostic work.

The power box can be used in conjunction with a power supply units that can be found in many workshops, alternatively it can be connected to a car battery if there is no other power supply available.

The power supply box contains the appropriate ISO 7638 socket so that the ISO power cable and WABCO system diagnostics cable can be connected to it.

The power supply also has a lamp present that simulates the warning lamp feature of a trailer sign off.

## PARTS REQUIRED FOR TRAILER EBS E DIAGNOSTIC WORK

Some of the components / cables required to carry out diagnostic work on a WABCO Trailer EBS E system are as follows:

- WABCO Australia Power Box
- WABCO Diagnostic Interface (446 300 030 0)
- WABCO Diagnostic cables (446 301 360 0 & 446 300 361 0)
- ISO (Susie) power cable, (ISO / Susie power cable not required on dog trailers)

All the WABCO diagnostic cables and interface, mentioned above, required to carry out trailer diagnostics are part of the WABCO trailer diagnostic case, 446 301 023 0 (except the WABCO Australia Power Box)
