

ELECTRONIC AIR PROCESSING UNIT (E - APU) FOR SCANIA VEHICLES AVAILABLE FOR THE AFTERMARKET

In addition to our actual aftermarket repair kit portfolio for the SCANIA E - APU, we now offer the full E - APU unit for the aftermarket to replace the factory installed E - APU.

The WABCO E - APU includes an Air System Protector cartridge with a coalescing function (432 901 228 2) and offers the same functionality as the factory-installed E - APU.

*E-APU

DIAGNOSTIC SOFTWARE

To copy the parameters of the E - APU to be replaced to the new EAPU the WABCO APS – E - APU Diagnostic Software V1.10 is needed, which is available at myWABCO (<https://www.am.wabco-auto.com>).

The E-APU Diagnostic Software is available as part of the diagnostic full package, truck package and bus package. In addition it's available as single download.

The parameter transfer from the E - APU to be replaced to the new E - APU is done via the parameterization function. It reads the parameters from the E - APU to be replaced and stores them in a file. Then the parameters from this file are written to the new E - APU.

PRODUCT NUMBERS AND CROSS REFERENCES

The table below lists the product numbers that are covered by the new E - APU for aftermarket:

WABCO Part Number	Replacement for / Cross References	
	WABCO	SCANIA
932 510 009 0	932 510 000 0	1474663
	932 510 001 0	1535829
	932 510 002 0	1753577, 1738295
	932 510 003 0	1770184
	932 510 004 0	1928589, 1796161
	932 510 005 0	1941953
	932 510 006 0	2148069, 2063357
	932 510 010 0	2308777
