

ECAS Remote Control Units for the Aftermarket

With this e-Formation we would like to give you an overview of available remote control units (RCU's) for the Aftermarket.

The remote control unit allows the driver to take control of the ECAS functions and to issue certain commands into the system. Depending on the type of equipment fitted, it is possible to make use of the following functions.

- Change the reference level
- Lower the lift axle
- Store and recall memory levels

There are many different types of remote control units available. To make it more convenient for you, we set up a list showing the most common universal RCU's and the variants they can cover in the terms of functionality.

You thus can concentrate on these variants to cover the most important applications:

Universal RCU	Origin RCU		Application
446 056 113 0	446 056 012 0	446 056 013 0	Daimler
446 056 115 0	446 056 015 0		DAF
446 056 117 0	446 056 000 0	446 056 007 0	Diverse
	446 056 002 0	446 056 005 0	Renault
	446 056 009 0		
	446 056 011 0	446 056 014 0	Diverse
	446 056 016 0	446 056 017 0	
	446 056 018 0	446 056 021 0	
	446 056 024 0	446 056 027 0	
	446 056 028 0	446 056 029 0	
	446 056 032 0	446 056 035 0	
	446 056 100 0	446 056 124 0	
	446 056 127 0	446 056 128 0	
	446 056 132 0	446 056 136 0	
	446 056 137 0	446 056 140 0	
	446 056 142 0
